

USTUS AGUR SCHOLARSHIP STATUTE

The Ustus Agur Scholarship of the Estonian Association of Information Technology and Telecommunications (ITL), hereinafter referred to as the ITL Ustus Agur Scholarship, is intended to support the studies of one talented PhD candidate enrolled at an Estonian public university whose doctoral research is directly related to the field of information and communication technology (ICT) or, more broadly, examines the application of ICT in another field. The scholarship also honours Ustus Agur's outstanding contribution to the development of Estonian society.

Applications are open to individuals enrolled in a PhD programme at an Estonian public university. Any additional eligibility requirements, terms and conditions and the application deadline shall be specified in the call for applications.

In the ITL Ustus Agur Scholarship competition, the primary criteria for evaluation shall be the applicant's doctoral research topic, its expected impact on the development of Estonian society and the PhD student's academic and professional achievements to date. Applications shall also be evaluated based on other criteria specified in the relevant call for applications.

The decision to award the scholarship shall be made by an evaluation committee appointed by ITL, based on the received applications. The evaluation committee shall consist of three members.

The scholarship shall be awarded to an individual recipient. It shall be paid to the recipient in one or more instalments, as agreed between the recipient and ITL.

The scholarship recipient shall submit a written report to ITL on the use of the scholarship.

Any matters arising in connection with the awarding of the ITL Ustus Agur Scholarship shall be resolved by the ITL evaluation committee.

ITL shall publish the call for applications on its website and disseminate information about the scholarship through its communication channels and to its members.
